

Energy Policy Statement

Introduction

Aligned to our Climate Action Strategy, Belfast Harbour is committed to reducing the greenhouse gas (GHG) emissions, associated with our energy use, to Net-Zero before 2030, whilst ensuring that we continue to meet essential business requirements and the needs of our stakeholders. This policy provides a framework to set and review energy objectives and targets that will achieve this organisational goal.

Scope

This policy statement covers all energy related activities under the direct operational control of Belfast Harbour, including all Scope 1 and 2 GHG emissions.

Purpose

It is therefore the policy of Belfast Harbour to:

- Comply with all applicable legislation and other requirements to which we subscribe related to energy use, consumption and efficiency
- Incorporate energy efficiency considerations into procurement activities and to design for energy performance improvement
- Establish and maintain a formal Energy Management System that is appropriate to the nature, scale and performance improvement objectives of Belfast Harbour
- Develop awareness and encourage involvement in energy efficiency initiatives by employees, energy customers and other relevant stakeholders
- Ensure the availability of information and resources to set and achieve appropriate objectives and targets
- Demonstrate our commitment through external certification of our Environmental Management and Energy Management Systems to the internationally recognised ISO 50001:2018 Standard
- Strive to achieve continual improvement in energy efficiency, use, consumption and energy management systems
- Communicate this policy to all Personnel within Belfast Harbour and make it available to other stakeholders as required

Policy Review

This policy statement is periodically reviewed by the Leadership Team, to ensure that it remains relevant and appropriate to the scope of activities conducted by Belfast Harbour.

Joe O'Neill
Chief Executive
